St Faith's long-term Digital strategy will be further developed with the acquisition of a Surface Go for each child in Year 4 & Year 5 to enhance and develop digital literacy, help children build an understanding of where and when technology can be used to supplement and augment the ever-vital basic skills, as well as give parents greater information about what our children are learning at school and how they are progressing across the curriculum. The Surface Go will travel between home and school and become a 'digital portfolio'. All devices (not keyboards, cases or pens) will be fully insured and covered against accidental damage by an extended warranty scheme that allows a swift turnaround of one working day.
